**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freeman et al (2002/0188943) in view of Rainville et al (2002/0069411) for the same reasons as set forth in Section 8 of the last office action, dated 10/15/08.

With respect to the newly amended limitations, [0032]-[0037] of Freeman et al already discloses the concept of such common on-screen indicia and textual description of a variety of camera angle displays.

***Response to Arguments***

3. Applicant's arguments filed 1/13/09 have been fully considered but they are not persuasive. In response to applicant's arguments on pages 7-8 of the Remarks against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Regarding applicant's argument that neither Freeman et al nor Rainville et al discloses the on-screen indicia to identify the camera angle images, it was clearly stated in the previous office action that Freeman et al discloses all these means in Figure 1. It is true that Rainville et al does

not disclose any on-screen displays related to the transparent video as that claimed by the Applicant. However, examiner does not rely on Rainville et al to teach such capabilities because they are already disclosed in Freeman et al. Rainville et al merely provides the motivation that it would have been obvious to one of ordinary skill in the art at the time the invention was made, having both references of Freeman et al and Rainville et al before him/her, to modify the interactive system of Freeman et al to be upgraded as a transparent on-screen interactive apparatus by simply utilizing a PIP overlay to display the different camera angle viewing options to include the same interactive camera means and competitive displaying equipment as specified in claims 1-6. With an upgraded viewing system, one of ordinary skill in the art would have had no difficulty in applying subsequent display processing such as navigating, selecting, and superimposing the PIP images from the memory means 125 by the controller 135, as illustrated in Figure 1 of Freeman et al, since PIP processing is a necessary and well known technique for many video systems.

#### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
